

KICC 2026 Pre-Conference Workshop Agenda
Real World Data for Real World Impact
18 November 2026

Sessions	Topics	Key Highlights	Mode of Delivery	Proposed Speakers
1	From Data to policy	Explores how clinical data connects patient care, research priorities and policy decisions, with real-world LMIC examples.	Presentation	
2	Messy but still useful	<ul style="list-style-type: none"> • The realities of our current data - incomplete, lost, handwritten - how do we still make use of this data • Focuses on transforming day-to-day clinical observations into meaningful insights for patient management and research. 	Presentation with practical examples From the speaker	
3	Hidden in Plain Sight (Data Mining)	<ul style="list-style-type: none"> • Using routine clinical data (seeing value in day-to-day work) 		
4	Less but better - Designing smart cancer registries	<ul style="list-style-type: none"> • Minimum datasets • Data quality • Actionable insights from data, rather than a lot of data, most of which is redundant and not useful 	Presentation Small group discussions	
5	Ethics, Ownership and Trust <i>"Who owns this data?"</i>	<ul style="list-style-type: none"> • Consent • Data sharing • External collaborations • Protection of vulnerable groups • Feeding back with clinical teams from where the data came • Can the local doctor become a collaborator? 	Panel conversation	
6	Getting your data heard - Publishing LMIC haematology and oncology research strategically	Providing practical guidance on journal selection, avoiding predatory publishing, authorship equity and dissemination strategies	Presentation	Dr. Fidel Rubagumya
7	Closing Remarks and Action Points	What will I do differently next week?	Large group discussion	Participants and facilitators
